Further currencies on request

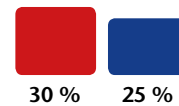

Reading off instead of Counting with INKiESS inserts for cash drawers.

Percentage of **time saving** and **mental relief** when counting coins by hand out of customary tills compared with reading off the cash balance on INKiESS coin holders.

CUSTOMARY TILLS

INKiESS SYSTEM

TIME SAVING / MENTAL RELIEF

Cash drawer inserts from INKiESS are optimising cash balance and offering a considerable additional benefit which does not exist in usual cash drawers.

Clearness and security

No matter how many coins there are – **Counting by Reading** makes the cash balance easy! The cash balance can simply and comfortably be read off the coin holder scales in less than 2 minutes. Single coins or coin rolls will slide into the coin section of its own volition. So after a short time you will be

able to use the cash tray blindfold. As the coins are staggered in the sections, coin edges will be evened out – which means safer counting.

“False” coins and foreign denominations are recognised immediately. Arranging the coins into the sections becomes just as easy as returning change.

In addition to saving time there is an enormous mental relief for the user.

Diebold Nixdorf®, INKiESS®, MiNiKORD® und MiNiCOiN® are registered trade marks. Legal protection exists for INKiESS single coin holders (european patent).
